# FIRST SWABBING-ROBOT *ON THE RUN*

# FIRST SWABBING-ROBOT ON THE RUN

## [1] No stop section necessary

Socabelec's Swabbing-Robot has been developed to swab **blanks** molds when they are **opened** to allow neck ring arm to transfer paraisons to finishing molds.

Socabelec's Swabbing-Robot is located in a **moveable safety cage**. Operators can stay close safely.

Socabelec's Swabbing-Robot is customisable to be installed on **all existing IS Machines** already in production.

Socabelec's Swabbing-Robot is worldwide protected by a **patent pending** against copy and use.

Socabelec's Swabbing-Robot is the first Swabbing-Robot in the world, **swabbing on the run** without loss of container after swabbing.

## [2] No Rejection after Swabbing

Socabelec's Swabbing-Robot is controlling continuously the **low quantity of oil sprayed** during the process. We use special **Glassline® SwabMatic** oil. The use of Swabbing-Robot and **Glassline® SwabMatic** oil simultaneous are part of the patent pending

## [3] 75% oil saving

Customers using **Socabelec's Swabbing-Robot** and **Glassline® SwabMatic** oil noted a **significant reduction of oil consumption**. For a section of IS Machine well maintained and optimised, oil consumption is around 50gr/24 hours/ section running at 14 cycles per minute.

On existing IS machines, we supply a special beam supporting the robot and the safety cage, merging the push button panels with the rail for the robot. Operators can continue to access easily to their machines as usual for maintenance and production.

## [6] Easy to use

Socabelec's Swabbing-Robot has been developed with a glass container producer for glass container producers to be **easy to use** by any operator.

[7] **Safety**

[4] **Multi Brand IS Machine**

[10] **Patented**

[9] **CE and UL standards**

[5] **Multi Process**

[8] **Beam**

Socabelec's Swabbing-Robot is complying with **CE and UL standards**.

Socabelec's Swabbing-Robot is able to spray in different process as **B-B, P-B, NNPB,...**
